PRODUCT CATALOGUE 2020 - 2021

# SUSTAINABLE FUTURE

## A FAMILY BUSINESS WITH EVERYTHING UNDER ONE ROOF!

Modiform is celebrating its fortieth anniversary! We began producing packaging for bakeries and confectioners in 1980, and it wasn't long before we decided to turn our attention to trays for the horticultural industry. Modiform was founded by Jan van Heugten, now deceased, whom we must thank for laying the foundations for our wonderful family company! Forty years.... an anniversary that we shall be celebrating in a way that is fitting for these unusual times, and that is reflective of the difficulties faced by the industry as the result of the coronavirus pandemic. Without denying the challenges, we are always looking forwards rather than backwards. And it is with this in mind that we are pleased to introduce our new catalogue.

### Sustainable, naturally

As you no doubt already know, sustainability has always been very important to us. Thinking and acting sustainably have been in our DNA for forty years, even when it wasn't commonplace. We are incredibly proud of this! As we are of the relationships that we have with our customers. That's sustainability too!

We are also proud of the fact that we have everything under one roof, from film and product production to storage, distribution, and recycling. All of this means that we can optimize each and every process. And better still... together with our customers, we are on the cusp of new and sustainable innovations. Products that are not only responsible towards our environment, but also of economic interest to you. As you browse through the catalogue, you'll not fail to notice that these products are also a feast for the eyes.

### Continuous development

We are well on the way to producing as much of our range of products from recycled materials as we can, and we are committed to ensuring that they can be recycled again after use. In addition, with our EcoExpert products made from cardboard, we have created a high-quality alternative to plastic. Our range of packs has also gone through considerable development in recent years, resulting in a wide selection of transparent green PET packs. These packs can be sent for recycling with the regular household waste. Our trays have an attractive gloss layer, which is also produced from recycled material. In addition, our black trays are now also produced from 100% recycled material!

In everything that we do, we are committed to close the material loop. Are you with us? Please get in touch to discuss your needs and ideas. We are ready to help you!

We wish you a successful season, together we are strong!

On behalf of the Modiform team,

Dick van Heugten  
Jan van Heugten

# MODIFORM

At Modiform, we believe in new possibilities, with a focus on tomorrow's world. Modiform is working to create trendsetting solutions for growing, transport, and packaging systems in the horticultural sector. Together with our customers and chain partners, we give recycled materials a new, usable life each and every day. Through smart designs, the right composition, a reduction in raw materials, increased reuse of materials, and upcycling, we can continuously make our production better and more sustainable. By cooperating together in the chain, we can build more circular systems, making it possible to preserve raw materials for longer.

**'SUSTAINABLE PRODUCTION IS PART OF OUR DNA, AND WE LOOK AT HOW WE CAN IMPROVE SUSTAINABILITY ON ALL FRONTS.'**

We do our utmost to find the right solution for every request. We do not shy away from a challenge. There is no such thing as 'impossible'. By being persistent, thinking things through, and acting on them, we always find a solution. In this way, we work with clients to create new products and product combinations that address the needs and problems of both clients and the market.

## CONTINUOUS IMPROVEMENT

We aim to continually improve product quality through extensive product development, machinery modernisation, and quality control improvements. In addition, we work with the best people and the best materials. Our quality is reflected in everything that we do – the products we make, our solution-focused approach, and our high level of service.

# SERVICES

What makes us unique? We have everything under one roof, from foil and product production to storage, distribution, and recycling. All of this means that we can optimize each and every process.

## FAST DELIVERY

Modiform has a strong logistics infrastructure, tailored to meet your needs. We have a wide stock of pots and trays. From there we can deliver many products. We always do our utmost to deliver as quick as possible. For most products, orders placed today are delivered tomorrow. We also have short delivery times for custom products and customer-specific concepts.

*Check our website or Customer Service if the article you need is on stock.*

## MAKING LIVES EASIER

Modiform is a flexible organisation that evolves along with its clients, with maximum focus on reliability and client service. We help our contacts to achieve optimum returns in every field. Alongside product development, we can support you during the next commercial steps – from pricing through to advice and promotion. We are happy to advise you about packaging, colours, printing or labels. And we gladly help you recycle your pots or trays. Read more about this on page 14. In this way, Modiform contributes to your returns and makes your life easier!

*If you would like to find out the best solution for your products or how we can support you, please contact our Customer Service.*

**'MODIFORM IS HERE FOR YOU'**

# CLOSED LOOP COMMITMENT

Plastics have come to play an essential role in our everyday life. However, the environmental impact of plastics cannot be ignored. Modiform accepts its responsibility; sustainability has been key to us since 1980. We gather materials from society and add value by turning them into smart and high quality products. Every day we give recycled material a new life together with our customers and chain partners.

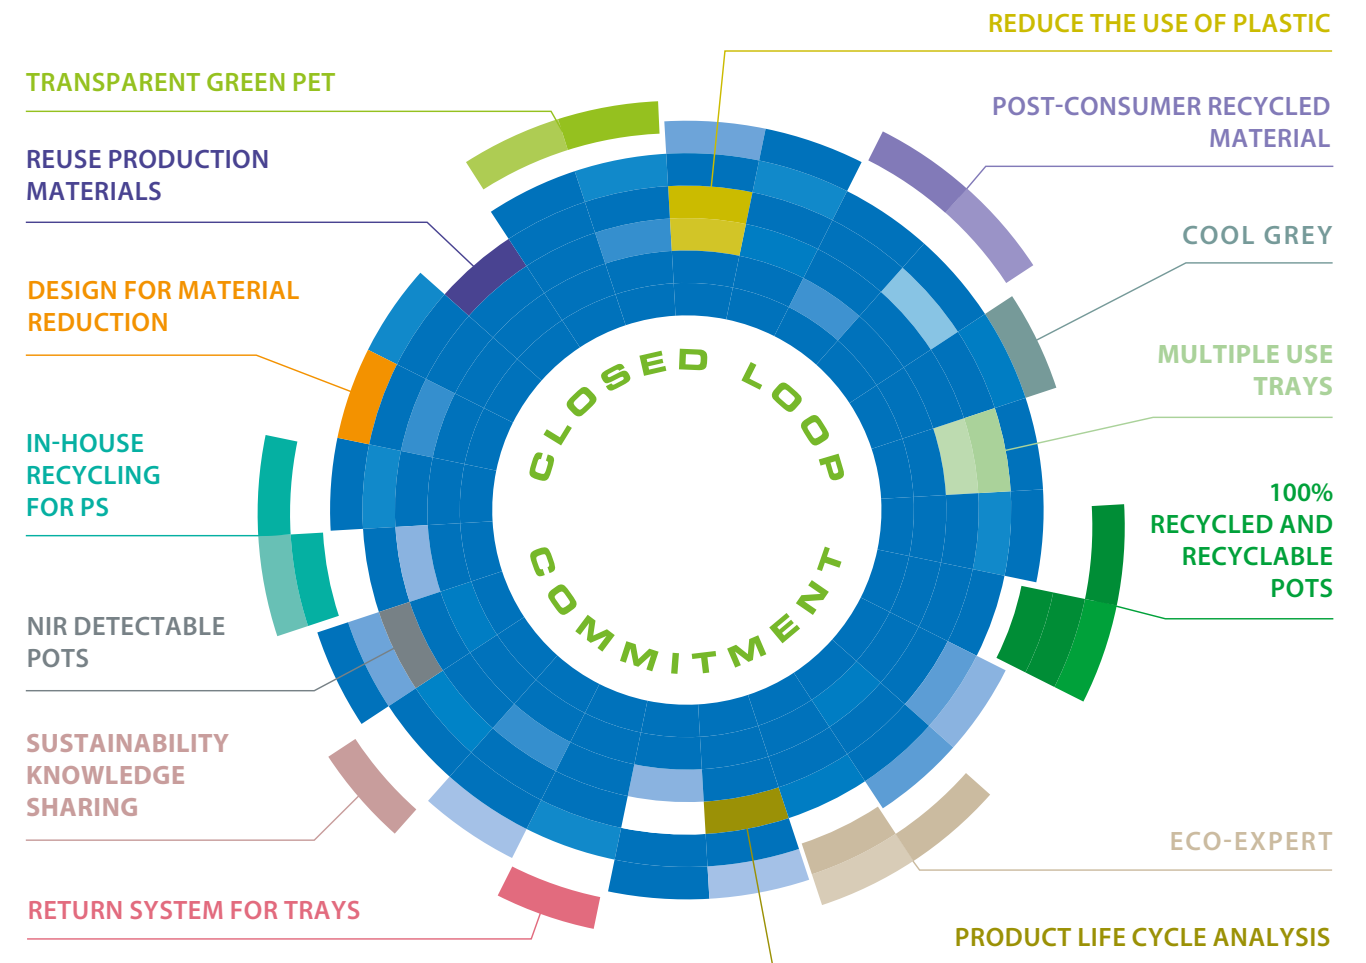

Our Closed Loop Commitment focuses on maximum preservation of materials. This is how we prevent unnecessary loss and lower the environmental impact of our products. We close the loop by focusing on optimal design, appropriate composition, reduction and recycling of materials and reuse of existing products.

‘CHECK OUR WEBSITE FOR  
EXAMPLES OF CLOSING THE  
MATERIAL LOOP TOGETHER’

## CLOSING THE MATERIAL LOOP TOGETHER

Modiform is doing everything they can to close the material loop! But we can't do it all by ourselves. By cooperating together in the chain, we can build more circular systems. We do this with our customers, the customers of our customers and the horticultural supply and recycling chain. We challenge ourselves and our supply chain partners to become more sustainable wherever possible.

*Can we close the material loop together? Yes, we can! Please contact our Customer Service for more information.*

### REDUCE THE USE OF PLASTIC

Cooperation with wholesale chain partners in order to reduce plastic usage in the supply chain.

### POST-CONSUMER RECYCLED MATERIAL

Pots made from post-consumer waste. 100% recycled plastic (PP) and recyclable.

### COOL GREY

Trays made from 100% recycled plastic (PS) from refrigerators.

### MULTIPLE USE TRAYS

Due to our multiple use propagation and transport trays there is less plastic needed and the CO<sub>2</sub> footprint is lower.

### 100% RECYCLED AND RECYCLABLE POTS

Certified pots for recycling. 100% recycled plastic (PP) and recyclable.

### ECO-EXPERT

An alternative for plastics. Products made from 100% recycled and recyclable cardboard.

### PRODUCT LIFE CYCLE ANALYSIS

Analyzing our products and processes to understand how to reduce the CO<sub>2</sub> footprint.

### RETURN SYSTEM FOR TRAYS

Set up return systems to collect products for recycling. Gather trays of a national retailer in Denmark

and growers in several countries for our in-house recycling of PS.

### SUSTAINABILITY KNOWLEDGE SHARING

Active information exchange with customers and chain partners. Participation in panel discussions.

### NIR DETECTABLE POTS

Detectable by infrared separation system for waste. Pots will be sorted correctly as plastic (PP).

### IN-HOUSE RECYCLING FOR PS

We doubled the capacity of our recycling system this year. Working with the supply chain to create closed loop systems for trays.

### DESIGN FOR MATERIAL REDUCTION

Smart design for strong products with less material. Our strong paperpot trays need minimal use of plastic.

### REUSE PRODUCTION MATERIALS

Recycle the waste of our foil and production and reuse it as material again. Even the polluted recycled plastic (100.000 kilo a year) is processed externally into new products.

### TRANSPARENT GREEN PET

Detectable by infrared separation systems for waste. 100% post-consumer recycled material and recyclable plastic (PET) bedding packs.

# RECYCLED MATERIALS

Modiform provides solutions based on recycled raw materials. Our range of products made from fully recycled materials is increasingly expanding. It includes our new line of sustainable pots, transparent green PET bedding packs, and our EcoExpert product line. We recycle the materials in our in-house recycling system or we buy the recycled raw materials. Since recycled materials are used, the colour may deviate slightly between the batches.

## TRANSPORT TRAYS

Within our range of transport trays, we work on as many trays as possible from 100% recycled PS. Our trays are known for the beautiful gloss coat. This coat is now also made from recycled material. This means that our black trays are made from 100% recycled material!

**'WE GIVE RECYCLED MATERIALS A NEW LIFE EACH AND EVERY DAY'**

## ECO-EXPERT

Modiform's EcoExpert is a sustainable and environmentally friendly product series. This series is made from 100% recycled paper pulp and cardboard and is fully recyclable.

Many of our EcoExpert trays are released into the auction's tray rebate scheme of Royal FloraHolland. These trays have passed the stringent tray tests so growers can obtain their rebate.

*[Check our website for more information and the settlement codes or read more about our EcoExpert products from page 180.](#)*

## EcoExpert

## A GREEN FUTURE

After five years of research and development we have made transparent green polyethylene terephthalate (PET) carry packs. These packs exist of 100% post-consumer recycled material, can be disposed of through the consumer waste for recycling and are easily separated by the infrared detection systems. And above all: they promote good plant growth!

Our assortment of PET packs has gone through major developments in recent years. The result is a wide range of transparent green PET packs.

*[Read more about our packs from page 83.](#)*

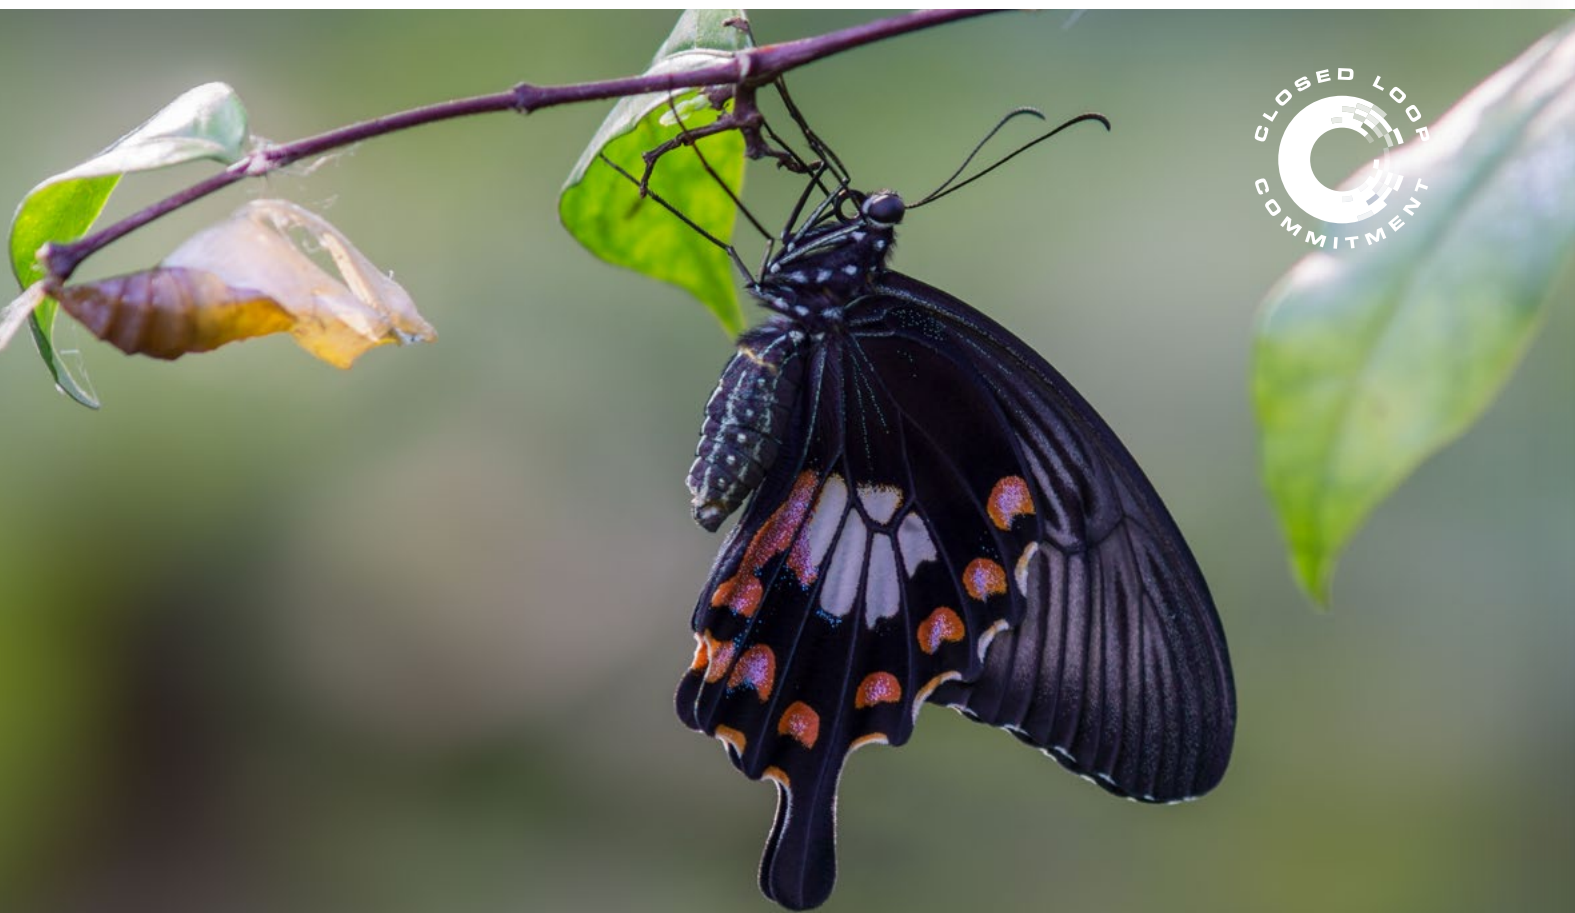

## SUSTAINABLE POTS

Modiform supplies pots with a maximum commitment for closing the material loop. We do this at the front of the chain by offering products that are recyclable, and at the back by using recycled materials. Our sustainable pots are:

- 100% recycled plastic (PP) and recyclable pots (R&R);
- 100% PCW recycled plastic (PP) and recyclable pots PCW);
- NIR detectable pots (NIR).

The certification of our pots is in full swing. We work with Cyclos certificates that stands for 100% recyclability. By using recycled materials as much as possible and producing recyclable products we close the material loop. Read more about our sustainable pots on page 20.

*[If you would like to learn more about our materials or products, please contact our Customer Service.](#)*

# RECYCLING

Modiform have been producing recyclable products from recycled materials since the very early beginnings of Modiform. And we are proud to report that we have been recycling in-house for over 30 years. Not only our own products but also the waste of our foil and production.

## RECYCLING YOUR POTS AND TRAYS

With our Closed Loop Commitment we focuses on maximum preservation of materials. Therefore we are happy to help you recycling your pots and trays. Whether it is polystyrene (PS), polypropylene (PP) or polyethylene terephthalate (PET), we help you to find a suitable solution for processing it. We recycle PS in-house, for the other materials we have partners who take care of this.

## IN-HOUSE RECYCLING FOR PS

Last year, we increased the capacity of our recycling department for PS material so that we can process even more returned material. We will be happy to collect your used PS trays so that they can be recycled and made into new trays.

*Check our website or YouTube to see how our recycle department works.*

‘WE LOOK FORWARD TO AN EVEN MORE SUSTAINABLE FUTURE!’

Recycling pots and trays takes up a lot of time and effort. These flowcharts show how this process works. The flowcharts can be downloaded from our website.

*If you would like to discuss the best recycle solution for you, please contact our Customer Service.*

# CUSTOM CONCEPTS

We have an extensive product range, with around 10,000 unique items. If you are unable to find what you are looking for, we will work together with you to develop a custom product. Together with our clients, we create sophisticated, trendsetting solutions in answer to the challenges you face. In this way, we stimulate success and progress for everyone.

We have pots in all sorts of colours and sizes. We also have a suitable tray for each type of pot so that you can present your product as attractively as possible. And you can further personalise your plant/pot/tray combination by printing your pot or using a suitable label or sticker. This enables you to offer your products as an attractive concept.

We will be happy to help you through the entire design process, from idea to finished product. This process results in new concepts, products, and packaging techniques that are designed in-house. Modiform has its own product development department and printing facilities.

‘WE GIVE RECYCLED MATERIALS A NEW LIFE EACH AND EVERY DAY’

## VERTICAL FARMING

We look forward to the future and collaborate with others to come up with a wide range of solutions. Especially for innovative developments that are very important for the future of the sector. Vertical farming will play a major role in the future as people attempt to grow more on smaller surface areas. Vertical farming can contribute in solving social issues, like the global food issue. Vertical farming is suitable for different types of crops.

### STANDARD TRAY

In cooperation with various (international) partners, we are developing a standard for this global emerging market. Modiform has developed a tray – the 6670 – which can be used for vertical farming. This tray can be processed automatically and is extremely suitable for vertical farming, because of its standardized dimensions (60 x 40cm). Due to its smooth design the young plants can easily be transplanted from the tray to the floater.

‘NEW OPPORTUNITIES WITH  
INNOVATIVE TECHNOLOGY AND  
STANDARDIZATION’

## COOPERATIONS

In order to close the material loop we cooperate with many parties in the supply chain. Together we can build more circular systems. We develop with our customers smart new products and set up collecting systems for PS trays in Europe with retailers and growers. We share our knowledge with the industry for example with LCA's to improve sustainability.

Modiform finds it important to contribute to the development of the horticultural sector as a whole, national and international. To contribute to new

sustainable standards and innovations. So we have partnerships with leading parties in the industry to become more sustainable wherever possible.

*Would you like to know more about our cooperations?  
Please contact our Customer Service.*

# SUSTAINABLE POTS

Modiform added many sustainable pots to its assortment. Now we have three categories in our range of sustainable pots: 100% recycled and recyclable pots, 100% post-consumer waste pots and NIR detectable pots.

## 100% RECYCLED AND RECYCLABLE POTS (R&R)

These pots are made of 100% recycled plastic and don't contain carbon black so they are entirely recyclable. After using the pots, consumers can dispose of them with their waste. We have achieved the highest possible in the field of plastic reuse with this pot!

- Made from 100% recycled plastic (PP)
- Recyclable through household waste collecting system
- Certified for recycling (Cyclos)
- Available in all types and models
- Additional colours available on request
- All pots are printable

## 100% POST-CONSUMER WASTE (PCW)

Modiform's range includes pots made from post-consumer recycled materials. The pots, which are produced from household waste, are made from 100% recycled plastic (PP) and are recyclable. For all sizes of thermoformed and injection moulded pots, you can choose from respectively four and five colours. Consumers can throw away the pots with their household waste. These plastic products can be detected by waste processors and can therefore be recycled.

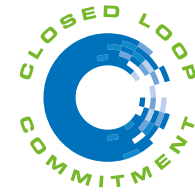

- Made from 100% recycled post-consumer waste (PCW) plastic (PP)
- Recyclable through household waste collecting system
- Certified for recycling (Cyclos)
- Available in all types and models
- Additional colours available on request
- All pots are printable

## NIR DETECTABLE POTS (NIR)

The Near Infrared (NIR) detectable pots are made as much as possible from recycled plastic and sorted by the NIR scanner as PP.

- Detectable by near infrared (NIR) separation system for waste
- Made from recycled plastic (PP) as much as possible
- Available in all thermoform types and models
- Additional colours available on request
- All pots are printable

# THERMOFORM POTS

## IDEAL, HIGH-QUALITY POTS

The Modiform thermoform pots offer outstanding versatility and stability. Our pots offer consistent quality and are highly suitable for optimum unstacking. The pots are available in trendy colours. Make your pots stand out with printed, labelled, and coloured pots. Feel free to contact us for more information.

# COLOURS THERMOFORM POTS

Modiform has a large range of coloured pots. The standard colour range consists of twelve colours for both round and square thermoform pots. All pots can be labelled and printed.

*If you would like to know more about our colour range, please contact our Customer Service.*

# CREATIVE CONCEPTS

## THOMSEN®

### INJECTION MOULDED POTS

- Strong & innovative designs
- Stylish & on trend colours
- Injection moulded pots since 1961
- Outstanding & uniform quality leading to smooth automation

### PRODUCT RANGE

- PotContainers®
- Shrub containers
- Growing pots 5°, 7° & 8°
- Orchid pots
- Art Déco
- Square / Round
- Custom made
- Azalea growing pots 8°

## INJECTION MOULDED POTS

### IDEAL, HIGH-QUALITY POTS

The Thomsen injection moulded pots have been produced since 1961. The range consists of around a hundred different products. The PotContainer® with its wide brim has become a trendsetter. The pots have a high impact resistance and are easy to unstack. Their consistent quality ensures smooth automatic handling. The pots are available in stylish and contemporary colours and are colourfast.

# COLOURS INJECTION MOULDED POTS

The Thomsen pots are available in more than ninety colours. All pot sizes can be supplied in this colour range. Specific requirements for the dye mean the pots are colourfast. The standard colour range consists of 24 colours for all our Thomsen pots. And all pot sizes can be supplied and of course they can be labelled and printed.

*For more information about the possibilities please contact our Customer Service.*

## PRINTING

### ULTIMATE BRAND EXPERIENCE AND STAND-OUT APPEARANCE

If you are looking for a unique pot, then have it printed! Printed pots ensure the best possible brand recognition, and their stand-out appearance increases product sales performance. Our in-house state-of-the-art printing lines will make sure your pot's print is sharp and eye-catching. Printing is an ideal method for displaying the plant passport on the pot.

*Choose a matching presentation tray so that the print of the pot is extra visible. Check page 73 for more information.*

## LABELS

### EYE-CATCHING PRESENTATION

Pots that are labelled stand out more. The useful information on the label tells you straight away what's in the pot. You can have the label printed with the plant passport, barcodes, plant names, and care tips. All round pots can be printed with an extra-adhesive and moisture-resistant label. The labels are available in different sizes.

FOR PLANT PASSPORT, BARCODES, PLANT NAMES, AND CARE TIPS

# EXCELLENT ADHESION

## NOTES

## TRANSPORT TRAYS

**GUARANTEED QUALITY FOR YOUR PLANTS**  
Extensive range of transport trays for pot sizes  
4.5 cm to 25 cm for both round and square pots.

## COLOURS TRAYS

Our standard colour range of trays consists of eleven colours: grey, violet, fuchsia, pink, dark blue, dark green, neon green, yellow, orange, red, and gold. All trays in our standard colours are going to be made of 100% recycled PS. We also develop all new colour requests based on fully recycled material. We use recycled materials wherever possible. This is why the colour may differ slightly from the colour supplied.

*If you would like to know more about our colour range, visit our website or contact our Customer Service. We are here to help!*

# UNIQUE PROTECTION

## RootBarrier

### PREVENT ROOT-STICKING WITH ROOT BARRIER

Root Barrier is a unique and innovative protective layer for your plant's roots! Applying a protective layer to the tray reduces root sticking.

- Makes automated transplanting of larger plants possible
- Less damage and rejects by reduced root sticking
- Flexibility in the production process; plants can stay in the trays longer

### Ground-breaking technology in horticulture

- Proven technology
- No effect on water quality (inert material)
- No residue in drain water
- Recyclable
- Can be applied to all types of Modiform trays

*Root Barrier was developed in collaboration with LKP Plants and Van Tuijl and is only available from Modiform.*

## ORCHID TRAYS

### PRESERVING BEAUTY

The Modiform orchid trays provide excellent drainage. Minimum root growth on tray base and minimum root sticking mean that the plants can easily be removed from the cup.

# NOTES

## PROPAGATION TRAYS

### SOLUTIONS FOR VARIOUS GROWING SYSTEMS

We have an extensive range of propagation trays that provide solutions for various types of substrates and plugs. This wide range of propagation trays fulfils the need for solutions for various growing systems.

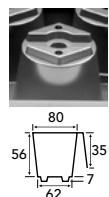

# PROPAGATION TRAYS

## MULTI TRAYS

- High folded edge, for added strength
- Smooth, shiny foil, easy removability
- Wide selection
- Bespoke work possible

## ECO-EXPERT

**COMPOSTABLE**

This product series is made from 100% recycled paper and cardboard. The pots and trays can be disposed of through the standard consumer or retailer cardboard recycling system, but if they find their way into the natural environment they will compost within a year!

MADE FROM 100%  
RECYCLED PAPER AND CARDBOARD

WATER RESISTANT

VERY STRONG PRODUCTS  
THANKS TO SMART DESIGN

RETAIL AND  
CONSUMER-FRIENDLY
